

Health benefits of running and jogging

Jogging or running is a popular form of physical activity. About one in five try running (or jogging) at some stage in their life. Running is an appealing exercise because it doesn't cost a lot to take part and you can run at any time that suits you.

Some runners choose to participate in fun runs, athletics races or marathons. If you are interested in competing with other runners, contact your local running club. Regular running or jogging offers many health benefits. Running can:

- help to build strong bones, as it is a weight bearing exercise
- strengthen muscles
- improve cardiovascular fitness
- burn plenty of kilojoules
- help maintain a healthy weight.

Running versus jogging

The difference between running and jogging is intensity. Running is faster, uses more kilojoules and demands more effort from the heart, lungs and muscles than jogging. Running requires a higher level of overall fitness than jogging.

Both running and jogging are forms of aerobic exercise. Aerobic means 'with oxygen' – the term 'aerobic exercise' means any physical activity that produces energy by combining oxygen with blood glucose or body fat.

Goal setting for running and jogging

Think about what you want to achieve from running or jogging. Issues to consider may include:

- Getting fit – if you're a beginner, you should start with brisk walking, progress to jogging and work up to running. This should take a few months.
- General fitness – mix your running with other forms of exercise (such as swimming or team sports) to maximise your overall fitness.
- Weight loss – adjust your diet to include plenty of fresh fruits and vegetables, lean meats, wholegrain cereals and low-fat dairy products. Cut back on dietary fats, takeaway foods, soft drinks and sugar.
- Companionship – you could run with a friend or join a local running club.
- Competition – running clubs may offer competitive events. Most clubs have sessions designed for beginners through to advanced runners. You can pit your running skills against others in fun runs or marathons. Many community-based running events cater for people of all ages and abilities. Join a local orienteering club to combine running with the challenge of navigating through various environments.

Running and jogging for beginners

Some general tips for beginners:

- See your doctor for a check-up before you start a running program. This is especially important if you are over 40 years, are overweight, have a chronic illness or haven't exercised in a long time.
- Pre-exercise screening is used to identify people with medical conditions that may put them at a higher risk of experiencing a health problem during physical activity. It is a filter or 'safety net' to help decide if the potential benefits of exercise outweigh the risks for you. Print a copy of the pre-exercise screening tool and discuss it with your doctor or exercise professional.
- Start with brisk walking. Aim for 30 minutes per session. Allow a minimum of six weeks to build up to regular running. Aim to increase your jogging time each session, and alternate between walking and jogging.
- Make sure you warm up and stretch thoroughly before you head out. Cool your body down with light stretches when you return.
- Make sure you have plenty of fluids and take a water bottle with you on your run. Try to drink plenty of water before, during and after any activity.
- Allow at least two complete rest days per week to avoid overtraining, which may cause injury. Consider other low impact activities, such as swimming, at least once each week.
- Plan your route. If possible, choose flat, grassy areas rather than hard or loose (such as sandy) surfaces to reduce the risk of injury.
- Avoid running near roads. This is especially important if you have a pre-existing condition such as asthma. Vehicle exhaust fumes can increase your risk of various cardiovascular and respiratory complaints or illnesses.
- Avoid the 'peak hour' periods to reduce your risk of inhaling air pollution from motor vehicles. If possible, schedule your runs for either the early morning or the evening.
- Wear loose cotton clothing. Dress your upper body in layers of clothing so that you can take off layers as required.
- Apply SPF 30+ sunscreen to exposed skin areas.
- Buy an appropriate pair of shoes.

Choosing running and jogging shoes

Issues to consider when choosing running shoes include:

- Don't wear your old sneakers. Poorly fitted shoes are a common cause of injuries.
- The running shoe should bend easily, feel comfortable and have a wedge of shock-absorbing material in the heel.
- The fit should not be too snug. Your foot will splay as it impacts with the ground.
- When buying the shoes, wear the socks you intend to wear while running.
- Have your shoes professionally fitted.

Health and safety suggestions with running and jogging

Suggestions include:

- Make sure you eat a healthy, well-balanced diet.
- Avoid eating directly before going for a run.
- Avoid running during the hottest part of the day in summer.
- Drink plenty of water before, during and after your run.
- Take your mobile phone with you.
- If using an iPod or headset, do not have the music too loud – stay alert and aware.
- Wear reflective materials if you're running in the early morning or at night.
- Tell someone where you plan to run and when you think you'll be back.
- Choose well-lit, populated routes and avoid dangerous and isolated areas.
- If you injure yourself while running, stop immediately. Seek medical advice.

Health and safety disclaimer

Being sensible whilst enjoying your running

We hope you enjoy your foray into running and that your fitness levels improve over time, using the Thread as part of your motivation, however, as much fun as we are all having, here comes the serious bit.....

- The Whitworth Thread exists purely to offer an opportunity for like-minded runners to exercise together in a group and nothing more.
- The Thread is operated and managed by a number of volunteers in their free time and these volunteers cannot accept any responsibility for any events that occur in the park. These volunteers may or may not have taken any training / coaching.
- All attendees should consider the Thread as an informal gathering of people who will run together in a loosely structured format.
- Every person attending the Thread must take full and complete responsibility for their own actions. Know your limits
- If you have any medical conditions that could affect you, please be sensible - it's your responsibility to check with your physician you're OK to undertake light exercise.
- If you feel dizzy, faint or unwell for goodness sake – stop! And notify a marshal.
- Appropriate clothing and footwear for running must be worn. You should dress appropriately for the weather and for the conditions.
- The Thread does not discriminate against any attendees, but we are unable to cater for any people with special requirements.
- Each runner must accept full and complete liability for their actions.
